# 295	Name: <b>BEAR CREEK</b>		Cause: Lightning	Admin: NOD

Narrative: At 16:45 zone surveillance in N9011N discovered the fire and reported it at 50 acres with a moderate rate of spread in black spruce and tundra. There was intermittent torching observed and the fire had a 60% active perimeter and 1` to 2` flame lengths. The fire was punching up a 6000` smoke column. Fire plots in a limited management protection area and was placed in monitor status.

# 289	Name: <b>LLOYD</b>		Cause: Lightning	Admin: NOD

Narrative: At 1235, J-17 was dropping para cargo off at fire 264 when they spotted smoke off to the North. The fire was reported as approximately six miles North of fire 264 and 3 to 5 acres in size. At 1240, a request was sent for one load of smoke jumpers, two scoopers and an air attack. At 1317, H-6015S flew over the fire on their way to fire 264 and reported the fire at 30 acres and a 100% active perimeter. The fire was running, torching and spotting in black spruce and had received no precipitation. There were no structures threatened and it was located North of an old burn. The decision was made to not take any action on the fire and standdown all aircraft. At 1318 the request to cancel all resources went through, however J-07 was already enroute and B-07 was taxing. At 1325, J-07 was cancelled and returned to Ft. Wainwright and B-07 was cancelled on the runway.

Narrative: Fire behavior today was described as extreme and included running, crowning and spotting in black spruce and tundra as well as creeping in hardwoods. The fire received one load of paracargo. Three type 2 crews were mobilized to Wickersham Dome for staging. Late afternoon crew shuttles into the fire were postponed due to extreme fire behavior. The crews were camped out at Wickersham Dome staging for the night. ICP was relocated due to the proximity and direction of spread of the fire. Three CL-215 Scoopers were used at different times throughout the day to help control the spread of the fire along the eastern flank. One type one crew remained in Fairbanks (AFS) overnight and will be transported out to the fire on 6/1. (+1306)

# 271	Name: <b>Hastings</b>		Cause: Lightning	Admin: L&W

Narrative: Active torching and running crown fire on the north flank. A convection column developed as the fire moved up the ridge in mixed timber. Crews will continue to work the right and left flanks of the fire, establishing sawlines and hoselays. The structure protection group will continue to assess and protect cabins along the Chatanika River. The Alaska T2 IMT assumed control of the incident at 1000. Crews worked to secure structures and keep the fire from moving south across the Chatanika River.

# 207	Name: <b>East Volkmar</b>		Cause: Lightning	Admin: Doyon

Narrative: The fire grew to 22,000 acres and is only 1% contained. It is anticipated that the fire will grow at least 10% in the next operational period. Dry fuels caused significant challenges for crews holding southwest corner. Air support was necessary to support the crew actions. Cabin protection is being implemented at the closest structures. Dry south winds accelerated fire growth causing torching, crowning, and short dramatic runs. For the next operational period it is planned to hold and extend the west flank from the anchor point on the southwest corner. Structure protection of cabins in the immediate vicinity will be ongoing.

Narrative: Fire activity was substantial enough to punch a vertical column through 40 mile per hour winds, and displayed isolated and group torching. High winds, low relative humidity, and a black spruce fuel source combined to form a vigorously growing fire. Critical personnel arrived today, while heavy equipment and ground personnel made significant progress along the northern flank today, and will continue to secure the direct line tomorrow. Ground personnel will continue extending the west line, and will also continue securing defensible space around threatened structures.
